

MEDIA = VIRUS

From the start, world-wide mainstream media all reported the same news as if they all belonged under the same umbrella and had to report in the same way

MEET KLAUS SCHWAB - THE FOUNDER AND CHAIRMAN OF THE WORLD ECONOMIC FORUM - THE WEF

This Marxist wants to reset the world, and he is powerful. Based in (where else) Switzerland, he has a plan for you and me.

The WHO, UN, EU and the WEF are pretty much deciding how the world should be run - a Globalist entity without borders, creed or different currencies - One World. Build Back Better is their slogan.

Great nationalist
Trump was in
their way - he had
to be removed.

These power-hungry people decide how the world should be run although nobody has voted for them to be in power! For them this does not matter since the Western World, together with China, simply follow their instructions. The Chinese model is seemingly used as their Blueprint and the MSM is their megaphone.

What is needed by these Globalists (George Soros, Xi Jinping and Bill Gates included) is to determine if the world's powers can be influenced without any wars. War is out of the question since countries like the USA, Russia and China are too powerful. The EU is too divided to agree to go to war and it could cause an election loss.

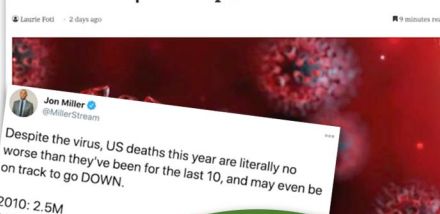

COVID-19 was the ideal test, and it seems the Globalist have succeeded. Virtually all governments follow their instructions and warnings. No individual government thinking. Just the way Schwab and co. wanted it. Now the time has been created for Ze Grrreat Reset. Sounds a bit like "A New World Order", doesn't it?

So, is Covid-19 not real? No, it is a real disease. The part that is not real is the way the masses have been duped into it's actual danger - **just like Climate Change**. Media images with needles, Hazmat suits and soldiers patrolling as well as ongoing fear-spreading articles has put the population in a state of fear. Fear is needed to force total obedience.

WHAT SHOULD BE BIGGER HEADLINES BUT STRANGELY ARE NOT:

Johns Hopkins Study That Showed COVID-19 Has 'Relatively No Effect on Deaths' in the U.S., Mysteriously Disappeared 4 Days After Publication | Tech News | Startups News

Has Covid killed off the flu? Experts pose the intriguing question as influenza cases nosedive by 98% across the globe

- Many feared 'twin-demic' of flu, which kills thousands, and Covid-19 this winter
- Thirty million people - 20 per cent more than normal - now eligible for the flu jab
- 'Surveillance' data collected by WHO shows how flu cases plummeted globally

In Japan, more people died from suicide last month than from Covid in all of 2020. And women have been impacted most

Tokyo (CNN) — Eriko Kobayashi has tried to kill herself four times.

The first time, she was just 22 years old with a full-time job. It was publishing that

didn't pay enough to cover her rent and grocery bills in Tokyo. "I was really poor,"

said Kobayashi, who spent three days unconscious in hospital after the incident.

Now 43, Kobayashi has written books on her mental health struggles and has a

steady job at an NGO. But the coronavirus is bringing back the stress she used to

feel.

Condition	Count	Percent
Hypertension	377	82.3%
Diabetes	249	52.6%
