

MEDIA = VIRUS

For those lost souls who still don't get it: Don't bet on the slogan "everything's gonna be alright". It won't happen. MSM publishes headlines galore on new Covid deaths of unvaccinated people. Where are the headlines: Covid deaths of vaccinated people? You would think this doesn't happen. Think again. With new variants and new vaccines around the corner, we will be suffering the ignorant restrictions for longer than you would like. All the world's crisis come from global foundations and organisations. A war fought without bullets and bombs, but still a war. Stay well-informed.

Arguments against Climate Change Cult deceptions

These graphs tell a positive story. They differ from MSM stories.

The story is:
Factual
Real-world
Science-based
Non-threatening

- No CO2 link to heatwaves
- No increase in natural bushfires
- No increase in heatwaves
- No danger in our global temps
- No increase in natural disasters
- No need to panic or fear
- We need optimism about our climate

QUOTE: Promises are worse than lies. You don't just make them believe, you also make them hope - Marilyn Monroe

What you hear all day from MSM:
Get vaccinated to avoid serious hospitalisation.
Is this statement factually correct?

Israel has fully vaccinated 60% of its population.
Well done to them.

Israel's Dr. Kobi Haviv: most new Covid hospital admissions have been fully vaccinated.

Have Covid emergency-use-only trail vaccines (their official description) become less effective?

Who would've thought.

Extra jabs or new vaccines will become available in time.

Until then, more restrictions await.

Dr Kerry Chant is the face of NSW's COVID response. Here's what her life is like.

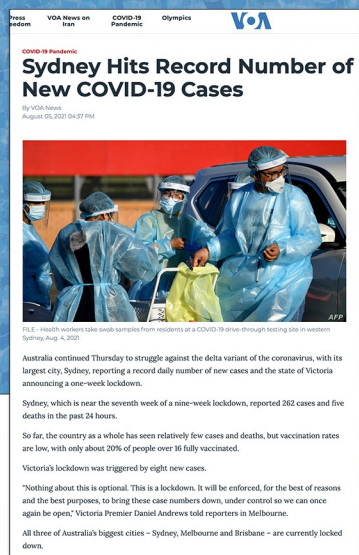

Single case hysteria: Overly strict measures could keep Australians in lockdowns for years

The crazy Aussies are at it again.

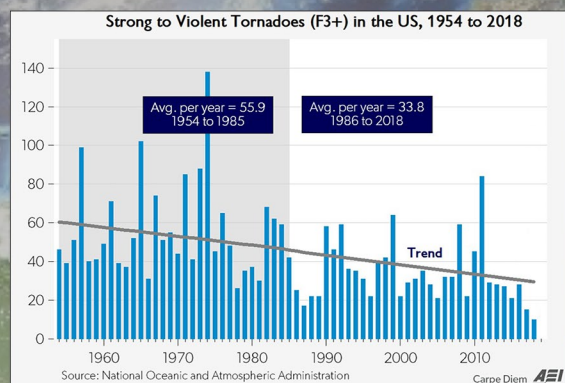

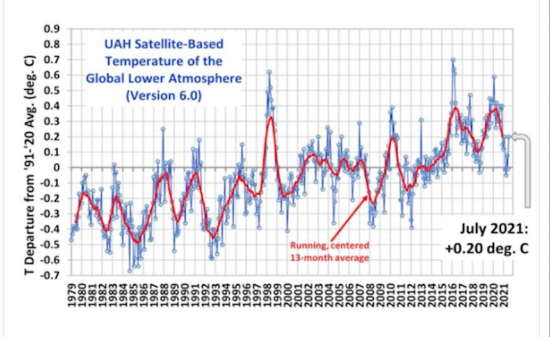

Sydney has been under a very strict Lockdown for 7 weeks already.

But guess what? Record numbers of new infections!

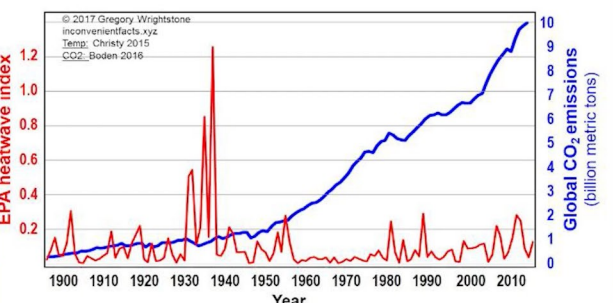

Just another example that draconian measures like lockdowns do not work.

Latest Global Temps

EPA heatwave index: no increase in extreme heat

Did you know: not much interest in CC
