

MEDIA = VIRUS

The man-made disaster is still gathering momentum. Vaccines or not, our freedoms have been pretty much throttled since March 2020. Everything returns back to normal once we have the vaccines according to your hero experts. Nothing of this sort has happened. You better believe it: once your rights have been taken away, do not expect them back without some sort of fight. This is how it was set out. It's not about saving the elderly and the weak: it's about the implementation of a carefully-scripted plan rolled out through MSM.

COVID ALERT Fears over the 'Lambda' Covid variant that's hit UK as 'unusual' mutations can 'dodge vaccines'

Adrian Zorzut
17:23, 2 Jul 2021 · Updated: 10:44, 5 Jul 2021

Many letters left in the Greek alphabet

Α Β Δ
Λ Ω Σ

Expect more similar articles in the near future. The population needs to be deprived of freedom for longer. If falling Covid cases become a problem to the cause, then just implement another variant to restart the cycle.

COVID DEATH RATES. FACT OR FICTION?

On average 560,000 people annually die in SA (47000 per month or 1540 per day)

HOME | SCORPIO | OPINIONISTA | ZAPIRO | SECTIONS | DECLASSIFIED UK | DONATE | NEWSLETTER

Extrapolating from the revised Covid-19 mortality, the true level of Covid-19 infections may range from around six million to nine million, depending upon the IFR used and method for estimating excess deaths. This is significantly higher than the reported 1.3 million infections to the week of 17 January 2021. And the infections may even be higher if the IFR is found to be lower than used here.

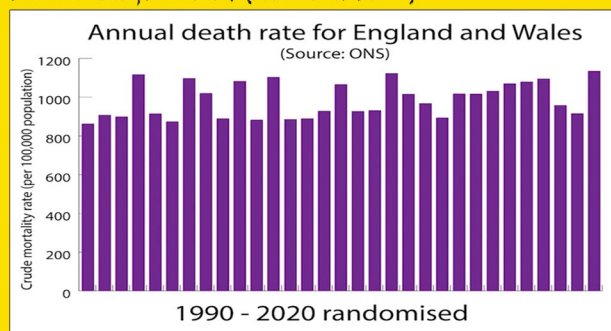

The "plausible" estimates cannot be regarded as anything more than tentative due to general uncertainty regarding a reliable IFR for Covid-19. Nevertheless, given the adjusted Covid-19 death estimates using the excess death information provided by the MRC, it is likely that the reported infections for SARS-CoV-2 are far from a true reflection of actual infections.

Excess deaths due to Covid? If you make a serious statement like this, please back it up with real proof, or are the death rate statistics below fake?

65,000 deaths on a 60,000,000 population - 0.1% (over 1.5 years) This means 99.9% either recovered and/or were unaffected. For this we have destroyed countless futures and a fragile economy. It's not even calculated annually, but since early 2020.

Death rates below are from 1990-2020 but not in order. Which line is from 2020? (see answer below)

answer: the twelfth line from the right

25 million people live in Australia

INFOWARS

Disturbing footage out of Australia shows a New Wales' MP declare the beginning of the "New World Order" as the government locks down the country over COVID once again.

New Wales Minister for Health and Medical Research Brad Hazzard dismissed lockdown concerns as "just the way it is," claiming citizens must "accept" this "New World Order" paradigm.

"This is a world pandemic," Hazzard said Saturday. "It's a one in 100-year event. So you can expect that we will have transmission from time to time, and that's just the way it is."

"We've got to accept that this is the New World Order."

As part of the "New World Order" model, the following measures have been imposed upon Australian citizens:

- Outdoor gatherings limited to 2 people
- Exercise permitted no farther than 10km away from home
- Browsing shops forbidden
- 1 person in household allowed to shop for essentials
- Funeral limited to 10 people

If that sounds unreasonable and authoritarian, that's because it is.

In fact, Australia recorded its first COVID death of 2021 just last week. So 1 person dies, and now a country of over 25 million must be locked down forever.

Welcome to the New World Order's Great Reset agenda.

With draconian measures like these, how will the population ever find freedom again?

MARXISM ON THE RISE - but will fall

Don Lemon Goes on Anti-America Rant, Says Americans Don't Think Black People Are "Fully Human," Forgets They Elected Obama

TWICE IN FACT

Colin Rugg · 3 days ago

During an interview with the Washington Post, radical CNN host Don Lemon claimed that Americans don't think black people are "fully human."

"We're living in two different realities as Black and White people," Lemon's said.

Lemon then went on to place all of the blame on former President Donald Trump, saying he inspired him to expose "systemic racism."

"It was a wake-up call to White people who thought we were living in a nonracist world," Lemon said of the election of Trump. "We're living in two different realities as Black and White people. We know, as Black people, what was lurking beneath the surface. I still believe that he was the necessary wake-up for America to realize just how racist it is."

Lemon said that him and other black people need to educate white people on race related issues.

It's all a joke - The Comedian

Australia recently recorded their second Covid-related death. You might think this is not a very high daily death toll, but... this is for the entire 2021!

Just imagine they get an outbreak of the flu! That could be disastrous for the country as many more would die.

Anyway, because of this, some states are back in a very strict lockdown.

Australia is about as locked out from entering by the rest of the world as North Korea is. A true police state.

This is a good example to show that it's not really about any pandemic. It's about control and implementation of new sets of rules we should live by.

Calls to add 'climate change' to death certificates

21 MAY 2020

Published in The Lancet Planetary Health, figures show over the past 11 years 340 deaths in Australia were recorded as being due to excessive heat but statistical analysis found 36,765 deaths could have been attributed to heat.

"Climate change is a killer, but we don't acknowledge it on death certificates," co-author Dr Arnagretta Hunter, from the ANU Medical School, said.

The hidden toll of July Fourth fireworks

Using crowdsourced data from home air quality monitors, scientists found that vulnerable people and communities of color are disproportionately exposed to air pollution from fireworks celebrations.

BY MADELEINE STONE

PUBLISHED JULY 2, 2021 · 6 MIN READ

It's no secret that fireworks can cause some serious air pollution, in the United States as well as in other countries where holiday displays are common, like China and India. But not everyone is equally at risk from the noxious particles that suffuse the sky during our pyrotechnic light shows. In California, for example, vulnerable populations are more exposed to fireworks pollution on the Fourth of July.
