

MEDIA = VIRUS

For the masses to believe that Covid-19 was one of the most deadly and contagious diseases in history, you have to ensure that constant fear spreading is maintained. This the MSM and WHO have done successfully. Suddenly we hear that the virus could have been leaked from a lab in China. Would this finally become a turning point where we can be released from the WHO and their celebrity experts? Perhaps the truth about Covid can also be uncovered.

If you have proof that a deadly weapon-like virus has intentionally or non-intentionally been catapulted into the entire world from China (who denies this) you would almost be in a state of war. You would hold this country responsible for the carnage it has caused to your country.

But no. The Biden administration is not conducting their own investigation into the origin of Corona. Instead, they ask a global organisation - the WHO - to do this.

Their track record has proven to be poor. They have already conducted an investigation earlier this year where the outcome was that the Covid virus probably originated from an animal and not out of a lab. Why would you give them another chance?

Members of the international team:

- Prof. Dr. Thea Fisher, MD, DMSc(PhD) (Nordsjællands Hospital, Denmark)
- Prof. John Watson (Public Health England, United Kingdom)
- Prof. Dr. Marion Koopmans, DVM PhD (Erasmus MC, Netherlands)
- Prof. Dr. Dominic Dwyer, MD (Westmead Hospital, Australia)
- Vladimir Dedkov, Ph.D (Institute Pasteur, Russia)
- Dr. Hung Nguyen-Viet, PhD (International Livestock Research Institute (ILRI), Vietnam)
- PD. Dr. med vet. Fabian Leendertz (Robert Koch-Institute, Germany)
- Dr. Peter Daszak, Ph.D (EcoHealth Alliance, USA)
- Dr. Farag El Moubasher, Ph.D (Ministry of Public Health, Qatar)
- Prof. Dr. Ken Maeda, PhD, DVM (National Institute of Infectious Diseases, Japan)

The international team also includes five WHO experts led by Dr Peter Ben Embarek; two Food and Agriculture Organization (FAO) representatives and two World Organisation for Animal Health (OIE) representatives.

The World Health Organization has also been slammed for not doing enough to address the outbreak of the virus and released a 120-page report in March that dismissed the lab leak theory as 'extremely unlikely'. In the findings they also suggested that the transmission of the virus from bats to humans through another animal is the most likely scenario.

It's important to know that countries do not conduct their own investigations of national interest anymore. The Great Reset dictates that globalist organisations need to be placed ahead of a country's own sovereignty. You allow your own interest to be dictated externally.

NATIONALISM IS TO BE GIVEN THE BOOT.

'No one recovers until everyone recovers': World needs a post-Covid treaty to put nationalism aside and ensure virus stays defeated, 23 heads of state including Johnson, Merkel and Macron declare in open letter

- Boris Johnson, Emmanuel Macron and Angela Merkel warned of isolationism
- Said Covid is 'stark and painful reminder that nobody is safe until everyone is'
- Group of 24 world leaders and WHO head called for a new international accord
- The treaty would be similar to that agreed after war World War II, the article read

Also of concern is Marion Koopmans, who oversees the viroscience department at the Erasmus University Medical Center in Rotterdam, Netherlands. A decade ago Ms. Koopmans's deputy, Ron Fouchier, made international news by modifying a deadly flu virus to spread between ferrets. If an investigation finds it likely that the Covid-19 pandemic was caused by gain-of-function research, that would have repercussions for labs around the world, including at Erasmus MC. A spokesman for the organization didn't respond to a request for comment.

His interest is understandable. The British-born U.S. citizen has deep ties with the WIV. Millions of U.S. government dollars went to his organization to fund research at the Chinese institution. Mr. Daszak, who has consistently defended the Chinese government, didn't respond to a request for comment.

Peter Daszak, president of EcoHealth, personally thanked Fauci for supporting "evidence" that COVID-19 came from an animal rather than the Wuhan lab in an April 18, 2020, emails obtained by Buzzfeed show.

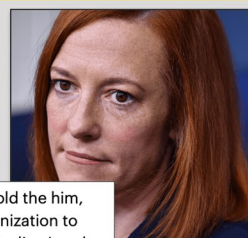

"I just wanted to say a personal thank you on behalf of our staff and collaborators, for publicly standing up and stating that the scientific evidence supports a natural origin for COVID-19 from a bat-to-human spillover, not a lab release from the Wuhan Institute of Virology," Daszak wrote to Fauci.

'I think you're misunderstanding the process': Psaki snaps at reporter during grilling on COVID origins and insists it's down to WHO and not the US to investigate the Wuhan lab

'I think you're misunderstanding how this process actually works,' she told the him, and said the Biden administration was relying on the World Health Organization to conduct an independent investigation - even though their report already dismissed the lab leak claims.

EXPERTS? - let the legal experts decide

Fauci - USA Van Dissel - NL Van Ranst - BEL Witty - UK Ferguson - UK

They've been at the heart of the action, dictating government policy, while drawing their full salaries and exercising real power without any type of responsibility. They've been invited by radio and TV producers to speak unchallenged tales of doom. These attention seekers have damaged the good name of science.
