

MEDIA = VIRUS

The world has decided that the entire population needs to listen to governments for their wisdom doing what is right for their populations. In turn they are advised by experts in their fields. If a wrong decision has been made by government they can blame the experts. If experts made the wrong decision, they are covered by the government and sometimes even MSM. Either way, there is no accountability. Our leaders are a joke and set poor examples - take the 2021 G7 meeting for instance.

British Prime Minister Boris Johnson on Friday delivered an eyebrow raising announcement when leaders of G7 countries **sat down for talks** in England, saying the destruction produced by the pandemic created a "huge opportunity" to build a "greener" and "more gender neutral and perhaps a **more feminine**" society in its wake.

Do they really believe some killer virus exists?

Facts are meaningless. You could use facts to prove anything that's even remotely true - Homer Simpson

A fitting quote for our great civil servant "leaders" as they can relate to Homer on a similar level

Covid 'alarm' that can SMELL if someone has infection: Ceiling-mounted device can detect if someone in a room has virus in 15 minutes by picking up their 'odour'

- Device can detect chemical changes in skin and breath of Covid-infected people
- Experts say Covid detection in large room could take between 15 and 20 minutes
- Although in early stages, study suggests device is up to 100 per cent accurate
- Further trials will take place and company is also developing hand-held device

- Coronavirus deaths in 2021 have already overtaken the total deaths from the virus in 2020.
- That's according to Johns Hopkins University data analysed by **The Wall Street Journal**.
- According to the paper's analysis, the tipping point was June 10.

What Are The Nuremberg Code's Ethical Guidelines For Research?

The Nuremberg Code aimed to protect human subjects from enduring the kind of cruelty and exploitation the prisoners endured at concentration camps. The 10 elements of the code are:

1. Voluntary consent is essential
2. The results of any experiment must be for the greater good of society
3. Human experiments should be based on previous animal experimentation
4. Experiments should be conducted by avoiding physical/mental suffering and injury
5. No experiments should be conducted if it is believed to cause death/disability
6. The risks should never exceed the benefits
7. Adequate facilities should be used to protect subjects
8. Experiments should be conducted only by qualified scientists
9. Subjects should be able to end their participation at any time
10. The scientist in charge must be prepared to terminate the experiment when injury, disability, or death is likely to occur

These rules were laid down after WWII.

They cement ethics and rights world-wide.

These ethics and rights are under threat.

In time, those who try to undermine these rights will be brought to justice.

Regardless if human tests were done or not, were these ground rules violated?
