

MEDIA = VIRUS

THE MANIPULATION AND FEAR-INDUCED MSM REPORTING IS CONTINUING IT'S VERBAL FEAR SPREADING UNABATED - we will stay in this mess

When the first lockdowns were forced into place, we were told it's necessary to protect the elderly and the vulnerable. Very noble and MSM and State were perceived to be caring and affectionate. "The virus will only be defeated when there is a vaccine" was the initial warning. There has been a vaccine for almost three months now but restrictions, lockdowns and fear mongering has continued regardless. Why? Well, I've got bad news: our world leaders have no intention to uplift lockdowns for ever. Climate Change lockdowns will be next or perhaps with a new threat from an unknown virus. We want our freedom back. Now and forever!

Figure 13: DataMart samples positive for influenza and weekly positivity (%) for influenza and SARS-CoV-2, England

Public Health England is yet to record a single case of influenza this year by February 14. But experts cautioned this doesn't mean the virus has completely disappeared, because the agency only sequences samples that it receives from NHS hospitals and as part of surveillance programmes.

Flu away: Scientists baffled at disappearance of influenza... but is it really gone, or just masked by Covid-19?

Lockdown has wiped out flu: NO cases of influenza have been detected in England this year because of tough social distancing measures, experts say

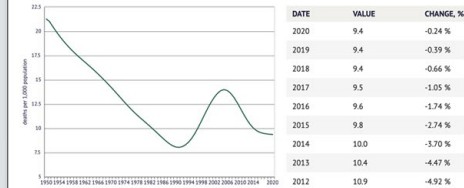

- Public Health England is yet to record a single case of the influenza virus in 2021
- Dr Vanessa Saliba said this was linked to social distancing and face coverings
- The NHS normally expects to see a mass influx of patients every winter

Would you say this is "spreading of misinformation" or is this worth debating? MSM, WEF, WHO, Big Tech & State think not.

QUOTE: When the State has you where they want you, why would they let go?

If social distancing and face masks resulted in an end of the Flu, then why do these measures not do the same for Covid-19? Both viruses cause almost identical symptoms. 2020 did not result in excess deaths over 2019.

What is South Africa death rate?

source: www.knoema.com

Covid-19 seems to have taken the place of the Flu. Could Covid-19 just be an aggressive Flu?

But wait a minute: many more have died from Covid than the Flu!

Well, that depends how you add up all causes:

More than half of South Africans have been infected with Covid, estimates Discovery's CEO

Business Insider SA Feb 11, 2021, 07:50 AM

Based on the country's high excess death number, Discovery estimates that more than half of South Africans have already been infected with Covid-19.

Along with a fast rollout of vaccines, this could assist with subduing the feared third wave of the pandemic.

For more articles, go to www.businessinsider.co.za.

South Africa's sky-high "excess" death number indicates that more than 50% of South Africa's population have already been infected by Covid-19, says Discovery Group CEO and founder Adrian Gore.

In an interview with The Money Show with Bruce Whitfield on Tuesday, Gore said that there's "absolutely no ambiguity" that the excess deaths are linked to Covid-19.

The latest data released by the South African Medical Research Council show South Africa's excess deaths during the pandemic have reached 187,241.

If this is correct then it argues the Covid-19 = Flu comparison. The death rate of Covid in SA would be 0.18%. The same as for normal Flu. 50,000 deaths from 28,000,000 (50% of pop.) = 0,18%

The common answer from departments and experts are that these deaths were unrelated to the vaccine or resulted from underlying illnesses.

Really? but isn't this also the case with over 95% of all Covid deaths!

STEINAR MADSEN

CHIEF PHYSICIAN, NORWEGIAN MEDICINE AGENCY

THOUGHT MSM keeps on reporting all infected Covid cases: 1.5 million have been infected in SA since the outbreak. (Meanwhile over 1,3 million have recovered). Now do the same for Flu: 200 million have been infected in SA since the outbreak of Flu. Now do the same with AIDS.
