

MEDIA = VIRUS

We can only know more if we read more. Reading from sources other than you're familiar with. Your favourite MSM news fix does not know you. They do not care what you believe. They want you to read their articles so they can generate profits from advertisers. For Covid vaccines: Inform yourself. Have an open mind. Ask questions. Read more diverse sources. It makes you a better informed person. With the Covid chapter coming to an end, a new chapter will present itself. Whatever this is, understand that whatever you hear or read, will not necessarily be the truth.

QUOTE: It is hard to imagine a more stupid or more dangerous way of making decisions than by putting those decisions in the hands of people who pay no price for being wrong - Thomas Sowell

NSW Health switches to recording patients as dying 'with' Covid instead of 'from' after finally acknowledging many of Australia's 993 casualties died from something else or had even recovered from the virus

- NSW Health will record patients as dying 'with' instead of 'from' coronavirus
- Dr Jeremy McAnulty made admission as the state recorded 1,218 cases
- He said it was 'difficult to know' exactly how much virus contributed to death
- In NSW, 145 people have died with the virus since the start of the pandemic

NSW Health has switched to recording patients as dying 'with' instead of 'from' Covid as it acknowledges not all of the country's 933 deaths were directly linked to the deadly virus.

Dr Jeremy McAnulty made the admission during Sunday's Covid briefing as the state recorded 1,218 new cases of coronavirus.

Six people died with Covid-19 in the 24 hours to 8pm on Saturday bringing the total death toll of this outbreak to 89 death since June 16.

Dr McAnulty said the change in language was because it was 'very difficult to know' whether someone with Covid died from the virus, or another health complication.

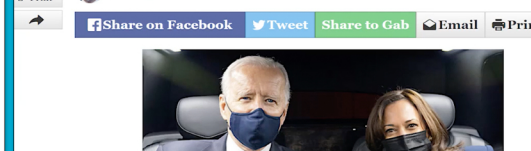

DIED WITH COVID, AND DUE TO WHAT WE SAID FROM THE START

Delta Variant The Vaccinated Are Worried and Scientists Don't Have Answers

By Kristen V Brown and Rebecca Torrence
21 augustus 2021 11:00 CEST Updated on 22 augustus 2021 16:31 CEST

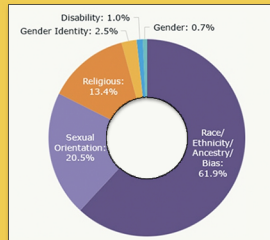

- Anecdotes signal surprising number of infections in vaccinated
- Officials must formulate plans despite a dearth of hard data

Anecdotes tell us what the data can't: Vaccinated people appear to be getting the coronavirus at a surprisingly high rate. But exactly how often isn't clear, nor is it certain how likely they are to spread the virus to others.

Though it is evident vaccination still provides powerful protection against the virus, there's growing concern that vaccinated people may be more vulnerable to serious illness than previously thought.

Gender-based hate crimes are small:

Hate crimes hit 12-year high in United States in 2020 - FBI

Asian community members hold signs calling for hate to stop at news conference organized to take a unified stand opposing hate crimes against members of the Asian Pacific Islander community on Monday, March 22, 2021 in Los Angeles, CA. (Jason Aronson / Los Angeles Times via Getty Images)

The number of hate crimes in the United States rose last year to the highest level in more than a decade, driven by a rise in assaults targeting Black victims and victims of Asian descent, the FBI reported on Monday.

The 2020 data, submitted to the FBI by more than 15 000 law enforcement agencies across the country, identified 7 759 hate-crimes in 2020, a 6% increase over 2019 and the highest tally since 2008.

The FBI data showed the number of offenses targeting Blacks rose to 2 755 from 1 930 and incidents against Asians jumped to 274 from 158.

The US Justice Department has warned that white supremacist groups represent a threat after the deadly 6 January assault on the US Capitol.

At the same time, reports of hate-inspired attacks on Asian Americans and Pacific Islanders have also been on the rise, spurred by what many say were former President Donald Trump's inflammatory remarks blaming the Covid-19 pandemic on China.

In May, US Attorney General Merrick Garland outlined new steps to help state and local police track and investigate hate crimes, which historically have been an under-reported crime to the FBI by local and state law enforcement.

THE USA: A COUNTRY OF 330 MILLION PEOPLE

Let's take the data that was not mentioned in this article for better context:

Hate crime against white people: 946. Almost all hate crimes for Asian- (335) and for Latino people (685) combined, but seemingly not worth mentioning. Of the 7 426 hate crime offenses:
- 53.4% were for intimidation
- 27.6% were for simple assault - not even a "klop" for the unsure.
Of the 2 913 hate crime against property most (76.4%) were acts of destruction / damage / vandalism. A result of the 2020 BLM riots?

Soaring: European Union Reports 1.9 Million Vaccine Injuries, 20,595 Deaths

South African MSM: Are you aware of this report? Now please inform your readers for complete info. Every life counts as you said so many times.

The UK government just reported the following data, tucked away in their report on variants of concern:

Less than a third of delta variant deaths are in the unvaccinated.

Let me say that another way - two-thirds of Delta deaths in the UK are in the jabbed.

To be specific:

From the 1st of February to the 2nd of August, the UK recorded 742 Delta deaths (yes, the dreaded Delta has not taken that much life).

Out of the 742 deaths, 402 were fully vaccinated. 79 had received one shot. Only 253 were unvaccinated.

The report is here.

But this is the crucial page. Look at the bottom line.

Some COVID-19 restrictions in NSW are easing for fully vaccinated people — this is what you need to know

By Cecilia Connell

Posted Yesterday at 5:59am, updated Yesterday at 9:46am

From 12:01am on Monday, September 13 people living in those LGAs can leave home for an hour of recreation every day, as well as the hour of exercise which is already permitted.

However, if people in your household want to take advantage of these new freedoms, all adults must be fully vaccinated against COVID-19.

"That is the key, as long as the adults in that family are all vaccinated, and can demonstrate proof of their vaccination," the Premier said.
