

# MEDIA = VIRUS

Never bet on the end of the world. If you are wrong you will be in trouble, if you are right it won't matter. MSM loves attention. They'll do anything to get it. Anything. Their constant bombardment of Covid dangers and vaccine salvation just doesn't stop. When taking everything into consideration we must go back to the question that will judge all that is currently happening and all that's happened over the last 20 months: **How deadly is this virus?** By answering this question, all regulations, restrictions and vaccine rollouts would either make sense, or they wouldn't. Decision time.

**'We are at war' says Spain of its coronavirus efforts, seeking extended state of emergency**

By Joan Posas

4 MIN READ

MADRID (Reuters) - The Spanish government sought to extend until April 11 a state of emergency that it has imposed to try to control Europe's second-worst outbreak of coronavirus while some regions on Sunday asked for harsher confinement measures to combat the pandemic.

**'We Are At War,' WHO Head Says, Warning Millions Could Die From COVID-19**

BILL CHAPPELL

**SHOULD YOU COMPARE A WAR TO A VIRUS?**

see excess deaths below

Governments seem to speak with the same voice, same words and same actions. It seems all centrally directed like with MSM.

In the beginning the WHO forecasted much death and danger...

World Health Organization (WHO) @WHO

"#COVID19 is a serious disease. It is not deadly to most people, but it can kill.

We're all responsible for reducing our own risk of infection, and if we're infected, for reducing our risk of infecting others." - @DrTedros #coronavirus

5:11 p.m. - 5 mrt. 2020 - Twitter Web App

World Health Organization (WHO) @WHO

"Globally, about 3.4% of reported #COVID19 cases have died. By comparison, seasonal flu generally kills far fewer than 1% of those infected" - @DrTedros #coronavirus

5:04 p.m. - 3 mrt. 2020 - Twitter Web App

...but later corrected their prognosis:

**Covid is not as deadly as made out by MSM**

**Results** I included 61 studies (74 estimates) and eight preliminary national estimates. Seroprevalence estimates ranged from 0.02% to 53.40%. Infection fatality rates ranged from 0.00% to 1.63%, corrected values from 0.00% to 1.54%. Across 51 locations, the median COVID-19 infection fatality rate was 0.27% (corrected 0.23%); the rate was 0.09% in locations with COVID-19 population mortality rates less than the global average (< 118 deaths/million), 0.20% in locations with 118-500 COVID-19 deaths/million people and 0.57% in locations with > 500 COVID-19 deaths/million people. In people < 70 years, infection fatality rates ranged from 0.00% to 0.31% with crude and corrected medians of 0.05%.

## Conclusions

All systematic evaluations of seroprevalence data converge that SARS-CoV-2 infection is widely spread globally. Acknowledging residual uncertainties, the available evidence suggests average global IFR of ~0.15% and ~1.5-2.0 billion infections by February 2021 with substantial differences in IFR and in infection spread across continents, countries and locations.

<https://onlinelibrary.wiley.com/doi/10.1111/eci.13554>

Their initial figures were corrected to reflect an IFR comparable to influenza. This factual correction was mostly ignored by MSM up until today.

As did Stanford University:

**Woran die Deutschen im Jahr 2020 starben - Statistik mit interessanten Ergebnissen**

26 Aug. 2021 21:19 Uhr

Von den 83,2 Millionen Bundesbürgern sind im Jahr 2020 mehr als 985.000 verstorben. Das sind 212.000 mehr als neugeboren wurden. Die Todesursachen werden vom Statistischen Bundesamt erfasst, so wie sie gemeldet werden. Ein Blick auf die Zahlen des ersten Pandemiejahres bringt interessante Erkenntnisse.

**Weniger Sterbefälle 2020 als erwartet**

Der übergroße Anteil der Verstorbenen hatte das Alter von 70 Jahren überschritten, wie ein Blick auf die aktuelle amtliche Statistik zeigt. In der erwähnten Analyse zeigen die entsprechenden Sterberaten der über 70-Jährigen, die über 89 Prozent der offiziell gemeldeten "COVID-19-Todesfälle" ausmachen: **Das Jahr 2020 liegt auf oder unter dem Niveau der Jahre 2016 bis 2018.** "Für alle Altersgruppen, ausgenommen die über 90-Jährigen, waren in den Vorjahren höhere Sterberaten zu verzeichnen", heißt es.

"the year 2020 is at or below the level of the years 2016 to 2018"

**Covid-19 in Wales: A third of positive cases are unvaccinated**

© 24 September

**In other words: two thirds are vaccinated**

**Vaccines are not as effective as natural immunity**

**Message of the unvaccinated:**  
Dear vaccinated,

We did not take away your freedom, the government did. We do not take your freedom hostage, the government does. If we're a threat, your vaccine doesn't work as you were told. If your vaccine does work, you need not worry about us.

When Covid vaccines become fully approved, more will vaccinate.
