

MEDIA = VIRUS

Are we living in a circus? Where is MSM when obvious hypocrisy is observed? Well they're reporting of course! Unfortunately, what they report is simply conveying the message of those attending. Take the COP26 and G20 summits for example. Both took place just a day apart. MSM tells you how great they were and how politicians continuously act on behalf of their citizens to ensure we are protected & cared for. Pure nonsense. They know it, MSM knows it and observant citizens know it. MSM will not criticize politicians as long as they are on the same side - which they are.

Meanwhile, President Joe Biden is expected to create 2.2 million pounds of carbon to reach the summit - as he's bringing four planes, the Marine One helicopter, and an enormous motorcade.

United States presidential state car:

Fuel consumption: approx. 50L/100 km.
It flies all over the world in a C-17 Globemaster plane.

Not a single electric car in sight. Why? Because climate change is no crisis.

It's a fabrication to create new taxes and jobs to make the top 1% of rich people even richer. Money is the real green.

Note: M=V is 100% against circus acts involving animals. There are enough people acts that can entertain us.

Spain's top court rules pandemic lockdown unconstitutional

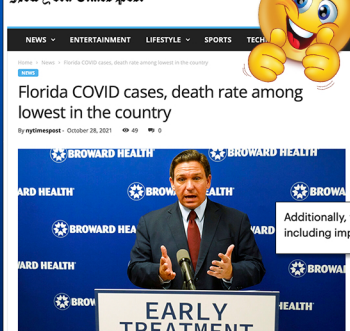

By JOSEPH WILSON
14 July 2021

BARCELONA, Spain (AP) — Spain's Constitutional Court ruled Wednesday that a strict stay-at-home lockdown order the Spanish government issued under a state of emergency during the first wave of COVID-19 last year was unconstitutional.

While upholding most terms of the state of emergency, the court said provisions ordering the population off the streets except for short shopping trips, unavoidable work commutes and other essential business violated Spain's Constitution.

New York Times Post

This should be all over MSM but the news is too good for them. Again: lockdowns (and mask mandates) do not work, and...

"They were writing non-stop negative stories about COVID in Florida and implying that it was the governor's fault," Pushaw told Fox News. "But now that we have the lowest infection rate in the entire country, those same media outlets are silent. So, you would think, if it was his fault at the peak, why isn't his credit right now?"

DeSantis' approach contrasted sharply with the likes of California's Gov. Gavin Newsom who shut down the large swaths of the state and imposed strict mask mandates - despite having roughly similar outcomes as Florida.

"As Florida now ranks lowest in the continental U.S. in terms of COVID-19 rates per capita, we are proud to have stood firm in protecting liberty throughout the pandemic," Lt. Gov. Jeanette Nunez said in a statement. Governor DeSantis' approach was guided by science, data, and pragmatism, not fear and alarmist narratives."
