

MEDIA = VIRUS

There is nobody imprisoned more than those who think they are free. MSM is still try to convince us that Covid is so terribly deadly also advocate forced (by excluding you from society or even education) experimental emergency-use-only vaccines and that our climate will destroy us all. There are many lost people out there that still believe that mainstream and social media are the undeniable experts and restrictions are good for us to save lives and our world from evil. Those that believe the MSM, actually perceive their lives to be free, while instead, they are imprisoned in an artificial-made world. The compilers of MSM narrative are hiding behind titles and academic achievements. As soon as anything threatens to change their small worlds, they lose track and have no idea how to handle it. They try to convince others to follow them into their narrow mindsets. Is it working for you, MSM?

WHO boss says 'narrow nationalism and vaccine hoarding' by rich countries caused Omicron variant

Talyer Simone Mitchell, Business Insider US

Dec 23, 2021, 11:26 AM

World Health Organization (WHO) Director-General Tedros Adhanom Ghebreyesus speaks during a press conference on December 20, 2021 at the WHO headquarters in Geneva. Photo by FABRICE COFFRINI/AFP via Getty Images

- The director-general of the World Health Organization released an op-ed in USA Today.
- He argued that Omicron is a result of vaccine hoarding.
- "If we end inequity, we end the pandemic," said Dr Tedros Adhanom Ghebreyesus.
- For more stories go to www.BusinessInsider.co.za.

The director-general of the World Health Organization blamed inequity for the continuing pandemic in a Wednesday op-ed for USA Today.

Shame, Trudeau is a socialist like yourself, Tedros! What happened to loyalty?

BTW: the Canadian PM is a real caring individual and loves his citizens. He never judges.

Justin Trudeau — The Unvaccinated are usually 'racist and misogynist'...

Canada has ordered more than 400 million COVID-19 vaccine shots: Here's the progress report

Six months into vaccination campaign, some companies have delivered while others are a work in progress

John Paul Taster, CBC News - Posted: May 21, 2021 4:00 AM ET | Last Updated: May 26, 2021

A man makes his way to a mass COVID-19 vaccination centre at the University of Toronto's Mississauga campus on Monday. To vaccinate all Canadians, the government has signed contracts with seven different vaccine makers with options to purchase more than 400 million doses. (Nathan Denette/Canadian Press)

Canada has a population of 38 million. This is enough for 10 vaccines per person. More than enough for many boosters, wouldn't you agree?

Why Children and Teens Should Get Vaccinated for COVID-19

There are approximately 28 million children between the ages of 5 and 11 years old in the United States, and there have been nearly 2 million cases of COVID-19 within this age group during the pandemic. COVID-19 can make children very sick and cause children to be hospitalized. In some situations, the complications from infection can lead to death.

Children are as likely to be infected with COVID-19 as adults and can

- Get very sick from COVID-19
- Have both short and long-term health complications from COVID-19
- Spread COVID-19 to others, including at home and school

As of mid-October 2021, children ages 5 through 11 years have experienced more than 8,300 COVID-19 related hospitalizations and nearly 100 deaths from COVID-19. In fact, COVID-19 ranks as one of the top 10 causes of death for children ages 5 through 11 years.

Children who get infected with COVID-19 can also develop serious complications like multisystem inflammatory syndrome (MIS-C)—a condition where different body parts become inflamed, including the heart, lungs, kidneys, brain, skin, eyes, or gastrointestinal organs. Since the pandemic began, more than 2,300 cases of MIS-C have been reported in children ages 5 through 11 years. Children with underlying medical conditions are more at risk for severe illness from COVID-19 compared with children without underlying medical conditions.

cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/children-teens.html

Leading Causes of Death in Children 5-11 Years of Age, NCHS, 2019

Causes of Death	Death (n)	Crude rate per 100,000
Accidents (unintentional injuries)	969	3.4
Malignant neoplasms	525	1.8
Congenital malformations, deformations and chromosomal abnormalities	274	1.0
Assault (homicide)	207	0.7
Diseases of the heart	115	0.4
Chronic lower respiratory diseases	107	0.4
Influenza and pneumonia	84	0.3
Intentional self-harm (suicide)	66	0.2
Cerebrovascular diseases	56	0.2
Septicemia	48	0.2

Total population 5-17 years, 2019: 52,715,248

CDC NCHS WONDER Online Database. Accessed at <http://wonder.cdc.gov/ucd-icd10.html> on May 6, 2021

cdc.gov/coronavirus/2019-ncov/vaccines/recommendations/children-teens.html

84 deaths vs 66

But not as bad as from influenza

Vague statement

Similar to when they're vaccinated

The same total as suicide and 16x less than accidents

66 COVID-19 associated deaths in children 5-11 10/3/20-10/2/2021

CDC NCHS WONDER Online Database. Accessed at <http://wonder.cdc.gov/ucd-icd10.html> on May 6, 2021

The world's governments and MSM have followed these experts and treated their advice and prognoses as gospel. Here are some of their publicly uttered opinions:

WHEN VACCINATED YOU CANNOT GET COVID ANYMORE - US President Joe Biden

Vaccinated people cannot transmit the disease anymore - Dr. Anthony Fauci, director NIAID

They're really, really good against variants - Dr. Anthony Fauci again

Vaccinated people don't carry the virus and don't get sick - Dr. Rochelle Walensky, CDC director

The key goals with vaccines is to stop transmissions - Bill Gates, software salesman

YOUR ANNUAL (OR BI-ANNUAL) DOSE OF EXPERIMENTAL MRNA GOODNESS AWAITS. LONG-TERM EFFECTS? WHO KNOWS?
